

TOP 15-42 mm

GA674F45P

TECHNICAL DATA

Material:

Carbon steel and polyamide.

Treatments:

Tempering: specific process to ensure maximum ductility.

Zinc coating: specific process to ensure maximum corrosion resistance.

Screw type:

Reinforced, Ø 4,2 mm.

Ductility:

●●●●●

Corrosion resistance:

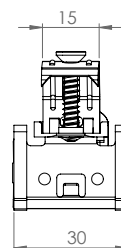

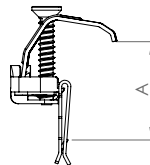

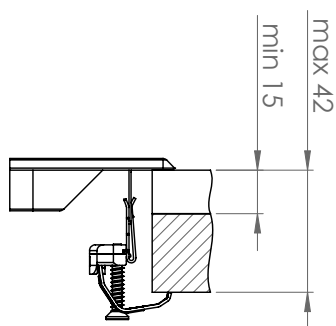

●●●●●

Tensile strength:

●●●●●

Clamping force:

●●●●●

Legend
A=0/30 mm

EverKlamp

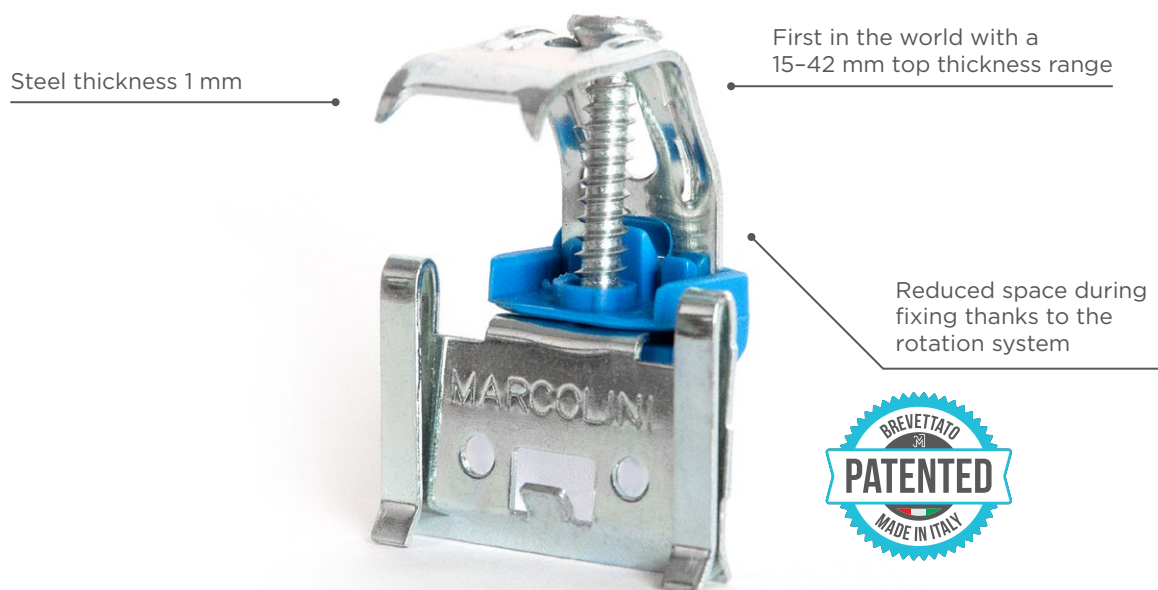

Universal system for inox sinks fixing

Designed to make every installation easier, safer and more precise, the new universal hook EverKlamp is an innovative solution that overcomes the limits of traditional fixing systems.

GA674F45P

EverKlamp

Universal system for inox sinks fixing

Thanks to two patented technologies, it guarantees:

- ✓ A **perfect adaptability to tops from 15 to 42 mm** (no additional spacers required).
- ✓ A **maximum compatibility** with large sinks and thin borders, thanks to the space-saving rotation system.

It is the ideal choice for fitters looking for **speed**, **reliability** and **maximum safety**, with all the quality guaranteed by a patented solution designed to last over time.

MARCOLINI company has been manufacturing sink fixing systems for about 50 years. The collaboration with leading partners in the sector allows the creation of high-quality components, also thanks to constant investment in research and development.

TECHNICAL DATA

Kitchen worktop height:
min 15 mm / max 42 mm

Sink type:
in inox

Material:
carbon steel
and polyamide

Treatments
tempering, galvanizing

ADVANTAGES

QUALITY

Each hook is manufactured with selected raw materials and processed through carefully monitored steps: from stamping to heat and galvanic treatments. The quality is verified by extensive internal tests carried out at MARCOLINI laboratory, including dimensional checks, traction tests, hardness, mechanical resistance and saline mist exposure. The result is a component that is reliable, precise and consistent over time.

EASE OF INSTALLATION

Thanks to the **SlimTwist** technology, the hook reduces the overall space required during mounting and fits perfectly even with large sinks and thin borders. The rotation system simplifies each step, allowing the fitter to operate quickly even in narrow spaces, with no compromises in safety or precision.

ADAPTABILITY

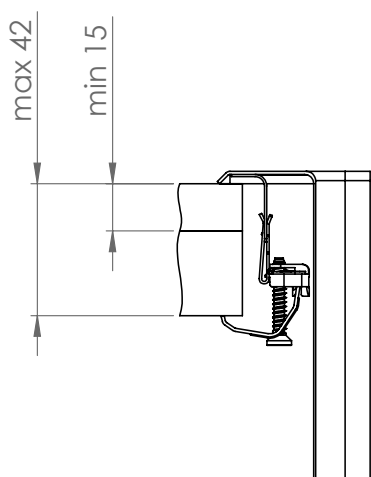

With the **SlideFit** system, the hook automatically adjusts to kitchen tops with thicknesses from 15 to 42 mm, covering one of the widest ranges on the market. No additional spacers or manual adjustments are required: just tighten the central screw to obtain a fast and stable fixing, regardless of the top thickness.

EverKlamp

Universal system for inox sinks fixing

TECHNOLOGIES

1

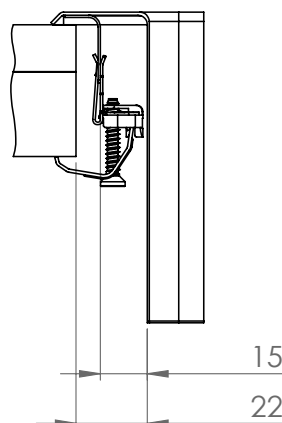

SLIDEFIT TECHNOLOGY

The first system in the world that automatically adjusts to top thickness from 15 to 42 mm, with no need for additional spacers or adaptors. By simply tightening the central screw, the hook allows quick and accurate fixing on a wide range of kitchen tops. A truly universal solution, designed to simplify every installation.

2

SLIMTWIST TECHNOLOGY

The rotation-based system that drastically reduces the hook's footprint during installation. Perfect for sinks with large bowls and reduced borders: it allows smooth and easy installation even in extremely tight spaces.
